GLOBAL MEDICAL TECHNOLOGY

COMPANY

Global Medical Technology, LLC (GMT) began operations in 1998 in the field of aesthetics, specializing in the **development, marketing and maintenance of equipment intended for hair removal, weight loss and skin treatments using non-invasive methods.**

GMT manufactures and distributes **leading aesthetics devices**, according to each country's standards. GMT represents a **quality benchmark at a competitive cost** distinguished by **unique developed systems.**

The constant investment in Research and Development makes the **Platinum GMT™ Series** one of the **most well-known and technologically advanced devices** in the world. Over 1,500 cosmetic clinics in different countries use GMT devices.

GMT COMPETITIVE ADVANTAGES

- > **Proven Results.** Many years on the market and the large number of clinics using our technology are the main guarantee of quality.
- > **Exclusive GMT Cloud technology** allows owners full remote control of the treatments at each clinic (sessions, schedules, operators...), accessing the system in real time from anywhere via Internet-connected devices. It also allows GMT customer service to monitor the equipment. This helps prevent possible breakdowns and facilitates online repair when needed, reducing downtime of the device.
- > **The GMT Department of Education trains and certifies all personnel** in charge of providing aesthetic services, and answers treatments related questions. This ensures that no competitor will have the same level of service, knowledge or attention to their customers.
- > **Treatment Speed.** Compared to similar devices currently in the market, GMT's have the highest performance pulses per minute and treatments spot size, ensuring the most efficient service.
- > **High performance.** Its unique cooling system with sapphire crystals allows these devices to be working for hours without overheating.
- > **Easy to use.** Its proprietary and intuitive software automatically calculates all parameters in just three steps.
- > **Computer Monitoring.** To keep both users and clients records.
- > **System Upgrades.** Allows clinics using these devices to ensure appropriate technological responses to competitors' improvements.

TECHNICAL SERVICES

- > Ongoing training and counseling
- > Cloud GMT Service: remote control of the devices
- > Warranty
- > Sale of parts and accessories guaranteed
- > Technical Services Contracts
- > GMT-business owner coordinated operation of the devices
- > Maintenance and infrequent repairs

Global Medical Technology has its own **technical service** so that in case of breakdown customer response is immediate and in most cases the problem fixed in less than 24 hours after.

PLATINUM GMT™ LASER TATTOO SYSTEM

SPECIFICATIONS

WAVELENGTH:	1064 nm and 532 nm
EMISSION POWER:	500 mJ
PULSE WIDTH:	4-10 ns
PULSE REPETITION:	1- 6 Hz
CONTROL PANEL:	8"- touch color screen
WEIGHT:	40 kg
DIMENSIONS:	115 cm x 25 cm x 48 cm
ELECTRICAL REQUIREMENTS:	AC 110/220 V +10%; 60/50 Hz

SUPPLIES

- PLATINUM GMT™ LASER TATTOO SYSTEM
- SMALL HEAD (1064 nm FREQUENCY)
- LARGE HEAD (532 nm FREQUENCY)
- GLASSES FOR OPERATOR AND CLIENT
- USER MANUAL AND WORK PROTOCOL
- TRAINING COURSE AND CERTIFICATES

APPLICATIONS

Platinum GMT™ LASER TATTO System is indicated for **eliminating tattoos and benign pigmented lesions**. The **1064 nm frequency** (small head) is indicated to remove dark tattoo ink (black, blue, green or other dark colors), pigmentation in lips, freckles and age spots. The **532 nm frequency** (large head) is used to eliminate red, brown, wine-colored or similar pigments.

PLATINUM GMT™ LASER TATTOO SYSTEM FOR ELIMINATING TATTOOS AND SKIN PIGMENTATIONS

The Platinum GMT™ LASER TATTO System is a laser procedure that emits specific wavelengths of light during a fraction of a second, and is absorbed by the skin pigments of the tattoos and melanin. High-potency pulses with short emission times of light combine it. It uses **1064 nm and 532 nm wavelength frequencies**, which allows different ink colors and pigmentations to be eliminated.

The machine has an **excellent refrigeration system** that allows it to **operate for several hours**. It also includes **easy-to-use software** with an **8-inch touch color screen**.

The machine is **ideal for removing undesired tattoos or for esthetically improving others**. It is **very versatile and safe**, and can eliminate a large quantity of tattoo colors, as well as pigmented lesions without **affecting blood vessels**.
